PITCHER & MANDA,

Short Hills,

New Jersey.

MAY,
1890.

THE United States Nurseries are situated in Short Hills, N. J., on the D. L. & Western R. R., only seventeen miles from New York City. Frequent trains leave from foot of Christopher or Barclay Streets.

We are pleased to see visitors at any time. A personal visit will facilitate selection of plants, and afford an opportunity of seeing the extent of our Nurseries.

TERMS: Accounts are made up monthly. Our patrons are requested to remit by checks, express, or P. O. Money Orders on New York Post Office, or currency in registered letters, as we cannot be responsible for moneys sent in unregistered letters. From *unknown* correspondents either a remittance or reference is requested with each order.

NO CHARGES are made for boxes, packing, or delivery to the railroad or express office. All plants are carefully packed and may be forwarded safely to any part of the globe.

ORDERS are solicited at as early a date as possible, that we may have ample time for their execution. Please write plainly Name, Post-Office, Express Office, and any other necessary information as to the best method of forwarding.

ADVICES OF SHIPMENT, together with the invoice, are sent the same day goods are forwarded.

COMPLAINTS, if any, should be made on receipt of goods; we promise prompt and just treatment of all claims presented.

HEAD GARDENERS AND ASSISTANTS. We have on our register names of several practical and trusty men for above positions, and will be happy to recommend them to any lady or gentleman requiring their services.

Cypripediums.

This Catalogue is inscribed to lovers of the Lady-Slipper Orchid, and contains a complete list of the varieties in our collection, April 15th, 1890.

It has taken several years to bring together this galaxy of rare and beautiful Cypripedes, which we are now prepared to offer upon their merits at very reasonable prices. It is our determination that the United States Nurseries shall deserve a good name, and none but true varieties in perfect vigor shall leave the establishment.

The glass-range at present consists of twenty-one houses, four of which will be devoted to Cypripedes, while seven acres of land are laid out in choice hardy plants. Of some Cypripediums we hold at present the exclusive stock, and of other very rare varieties, the number is limited to from two to twelve plants each; while in others, we can furnish specimens of various sizes and values, and by the dozen or hundred to the trade.

We believe the Cypripedium is the coming flower for general green and stove-house collections, as it is already a special favorite with the leading Orchid amateurs of Europe and America. The enthusiasm for this charming genus, which is without doubt one of the finest of the whole order of orchidaceous plants, has been gradually increasing for years, and the hybridists' skill and energy are being exerted to the utmost to increase and improve upon existing varieties, while numerous collectors are searching the unexplored tropics for new species. The existing varieties of the various species and hybrids are already so numerous and distinct, that one never tires of their beauty.

A good collection possesses a daily interest, and furnishes blooms throughout the year. When small plants are procured, they gradually grow into valuable specimens, so that they increase yearly in value, and become a good investment. Their culture is simple. To be grown to perfection, they like abundance of moisture and plenty of drainage, being potted in peat fibre alone, without soil—given a temperature of 60 to 65, with ventilation and shading from direct rays of the sun.

No cut flowers blend more charmingly with roses than *Cypripediums*. They are noble and beautiful in themselves, unique and graceful in form, rich and delicate in coloring, of great substance and durability. Their flowers last for weeks even after being cut.

Those who have never grown *Cypripediums* are recommended to begin with a few of the leading species, which are offered at very moderate prices. After they have seen the beautiful flowers they will desire to add as many new varieties as possible, and form a collection.

It is believed that the stock of *Cypripediums* of the United States Nurseries is the most complete and extensive known. Plants will be carefully packed, and patrons will be offered the advantage of receiving them in perfect condition, thus removing the difficulty which buyers have heretofore experienced in making importations.

JAMES R. PITCHER,
W. ALBERT MANDA.

SHORT HILLS, May 1st, 1890.

PREFACE TO THE THIRD EDITION.

Two editions of the *Cypripedium* catalogue have been exhausted, and now at the request of the public we publish this price-list which will be followed by the descriptive catalogue which we are now preparing.

Owing to the great demand for *Cypripediums*, we have increased our stock largely both by importations from the tropics, and by purchasing some of the most valuable collections, so that we now have the finest stock imaginable.

In most cases we have reduced the price as the quantity of the stock has become more plentiful, so that even the very best and rarest varieties are within the reach of every one making a collection of *Cypripediums*.

We especially beg to draw attention to the **COLLECTIONS** which we offer at very moderate prices, the selection being left to ourselves. The higher prices for each set secures plants of larger size.

6 plants, one of each variety,	-	\$5	or	\$10	for the set.
12 plants, one of each variety,	\$12,	\$23	or	\$30	“ “
25 plants, one of each variety,	\$40,	\$60	or	\$90	“ “
50 plants, one of each variety,	\$100	\$150	or	\$200	“ “

Collections from 100 to 250 kinds can be made at reasonable prices.

Cypripediums.
